Open Door Visions offers the couple-to-be a full bouquet of options tailored to suit your personal style perfectly. We're sure you'll find exactly what you're looking for as you choose from our video packages. And if you're looking for some extra blossoms to customize your package further, we offer an array of à la carte options that are sure to complete your vision of your happy occasion. We pride ourselves on being able to provide you with a videographer that has been involved with planning your event from the beginning. We restrict the number of people you work with to be certain that the person with whom you coordinate your plans will be present at your event, ensuring top-quality service from someone who knows what you want.

Package Descriptions

Open Door Visions has compiled the most often-requested videography services into four convenient packages. Read the descriptions below to see which one suits your needs best.

Carnation

The Carnation Package is anything but basic with up to three hours of pre- through post-ceremony, one-camera coverage. Basic editing and titling of your footage makes this a tremendous value and an excellent option for the couple that desires a simple yet high quality memento of their wedding.

Daisy

A level above the basic, the Daisy Package doubles the amount of pre- through post-ceremony camera coverage, recording the reception as well. Two-camera coverage and a wireless microphone will capture more of the events from the best views and ensure that there will be more footage available for basic editing and titling. This is an excellent choice for the couple that wants to revisit their ceremony and their reception for years to come.

Rose

Like the flower, the Rose Package is a favorite of many, and its value is hard to deny. You'll get the same, high-quality, two-camera coverage as in the Daisy Package. Also like its namesake, the true beauty of the Rose Package is in the details such as a Memories Montage and Honeymoon Montage, using your own photos, and more DVD copies. Advanced editing and titling of footage is enhanced with dissolving effects between both camera angles for flawless video viewing of your special event.

Orchid

Almost as extraordinary as the flower is the value of our Orchid Package. It has everything including up to nine hours of pre-ceremony through reception coverage, including off-location coverage. You'll enjoy all of the benefits of the other packages, but your advanced editing and titling will include our premium Memories and Honeymoon Montages, Wedding Highlights, and copies of all the original, unedited footage. You'll also get more DVD copies to share with loved ones and friends who also want to remember your cherished moments for many years. This is the ideal package for the couple that wants to remember every moment.

Extra Blossoms

If the descriptions above aren't quite perfect, choose one or more of our Extra Blossoms to customize your package.

- Memories montage
- Honeymoon montage
- Extra hour of single or dual-camera videography
- Web video highlights posted online for one year
- Copies of original, unedited footage
- Second camera at ceremony
- Wireless microphone on groom
- Extra Copies of DVDs

Many other services are available. Please do not hesitate to ask. Visit the Open Door Visions Web site today for more details, and give us a call at 814.684.7973 to discuss your wedding videography plans and how we can help capture your special memories.
